

**mySchoolBucks.com®**

# Overview

A SCHOOL-TO-PARENTS  
WEB PORTAL THAT  
PAYS FOR ITSELF!

Presenting mySchoolBucks.com® – it’s much more than a convenient online payment center for parents. Our mission from the start was to provide one central place where parents could go to care for ALL their children’s school needs. **We didn’t stop there.**

The outcome is a unique “school-to-parents portal” where school officials from public or private schools can connect online with their parent constituents.

The key components of the service include: an **Online Payment Center** that parents just love; a **School Store** that can be built for each school or for an entire district; a **Marketplace** that brings needed fundraising from corporate America right to your doorstep; and a **Wellness and Nutrition** center where parents can turn for reliable nutrition information on the foods their children eat. The benefits are numerous, from increasing revenue to schools to making life easier for school administrators to having the service pay for itself! Best of all, mySchoolBucks.com is a web service, so there are no computer servers to buy and no software to load or maintain.

**The best part...** it’s free to the district and parents. The only charges are \$2.00 when a parent makes a payment.
